

September 25, 2020

Dear Families and Staff,

As you are aware, Ontario is experiencing a significant spike in cases of COVID with over 400 new infections reported several days this week. What is of even greater concern to our agency is the resurgence of the virus in the Muskoka Region with record high cases reported through our Health Unit.

The CLSM management team have met and after reviewing recommendations from the Simcoe Muskoka Health Unit and consultation with MCCSS have determined that it is in everyone's best interest to discontinue short term/overnight visits and withdraw all indoor visiting at this time. CLSM strongly believes this is the best route to take in for risk mitigation surrounding COVID-19 cases on the rise.

We thank you for your understanding and cooperation as we work together to keep everyone safe and healthy. Please do not hesitate to connect with any member of our management team should you have any further questions

Sincerely,

A handwritten signature in black ink that reads "K. Haiduk-Collier".

Krista Haiduk-Collier
Chief Executive Officer
